

EV635

The EV 635 series provides a combined mirror optic with 24m Volumetric, 12m Volumetric and 60m L.R. detection patterns. Using a microprocessor with "4D" processing ensures maximum detection and stability. "Double Check" and "Eye to Eye" features in the EV 640 allow communication between detectors to verify alarms and minimise false alarms. EV 635 – 24m Vol./60m L.R., NC relay

Applications:

**Heavy Duty Long Range
Commercial/Industrial
Factories
Warehouses etc.**

Recommended Range:

4 - 60 metres
(Depending on pattern)
