## Unique features

The compact sized ACL200/200M cabinet lock is designed to be fitted in display cases, cabinets and lockers with either swing or sliding door requiring electronic control and where keys are not a practicable solution.

## Maximum Flexibility

Modern design enables the lock to be fitted vertically or horizontally whilst receiving the striker plate from the front, side or slide entry position. The ACL200/200M offers maximum flexibility and alignment adjustment whilst maintaining an excellent level of security for its size. ACL200M is a monitored version.

- Compact case size: 70mm (H) x 35mm (W) x 30mm (D)
- Stainless steel striker, holding > 250Kg.
- Flexible alignment
- Monitored version (CL200M)
- CE - Approved
