

MM-300 Transmitter

Description

The Prism Video™ MM-300 transmitter, based on patented digital video compression technology (CODEC), transmits live motion video and audio over TCP/IP based networks, including LAN/WAN and the Internet. The MM-300 is ACCESS' most compact and lightweight video transmitter, yet it is equipped with standard built-in features that you would expect on transmitters many times the cost.

The MM-300 offers affordability and superior performance in a package weighing less than two pounds. It is wall-mountable with easy-to-install brackets and is ideal for use as a compact desk or tabletop unit.

Combine the MM-300 with Prism Video™ receiver software for unsurpassed remote video transmission performance in a small package.

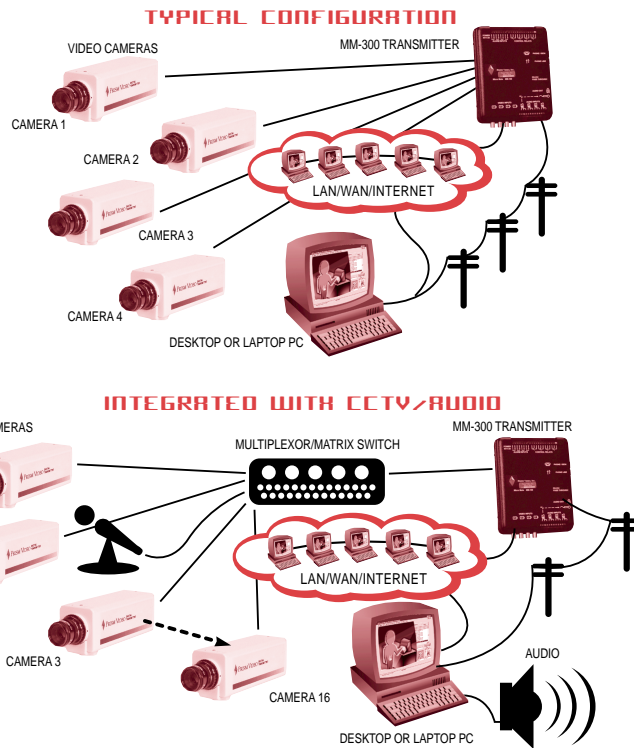

Features

- ACCESS' patented Prism Video™ compression algorithm for increased performance
- Video inputs - 4 standard BNC connectors, for CCTV/NTSC/PAL sources
- Audio inputs - 4 sets of screw terminal connectors configurable for 2 or 3 conductor line levels
- Telephone connectors (PSTN) include RJ-11 and RJ-45
- Microphone connector - one 1/8" mini-microphone jack for connecting standard pre-amplified type microphones
- 4 alarm inputs which interface via four sets of two position screw terminals
- PRE-ALARM™ and POST-ALARM recording
- 4 relay outputs for remote on/off switching for controlling lights, doors, and activating other mechanical devices
- Prism Video™ 10/100 base-T network interface included
- 2 year manufacturer's parts and labor warranty includes depot repair service

Specifications

Dimensions	6.5" x 8.25" x 2"
Weight	1 lb. 7.1 oz.
Power	External 5 volt DC power supply (120 VAC input/5 VDC output transformer)
