ADPRO VideoCentral Platinum

ADPRO VideoCentral Platinum by Xtralis is a multi-site video security management software application specifically designed to monitor video and audio from remote sites fitted with ADPRO video transmission systems.

ADPRO VideoCentral Platinum software is a single version product that will support multiple PCs and operators. It is ideal for either Central Monitoring Station (CMS) and command centre applications or for a single operator or laptop user who requires only periodic viewing or monitoring of a site.

Video Alarm Verification

ADPRO VideoCentral is widely used for video alarm and event verification of remote site alarms. Alarms cause the ADPRO remote video transmitters and recorders to connect to ADPRO VideoCentral and send video images of the alarm events. High priority events such as panic, duress or armed holdup can be viewed in real-time.

Site owners can use ADPRO VideoCentral on a PC or laptop to remotely view video or assess an appropriate response, eliminating needless visits by site owners or security patrols.

Interactive Monitoring

Typical applications include remote monitoring of staff, stock and general site activity. Interactive, user definable maps enable an operator to call and control sites directly from a map or site layout.

ADPRO VideoWall by Xtralis Surveillance Module*

ADPRO VideoWall module provides video surveillance capability across all ADPRO transmitters including ADPRO FastTrace / ADPRO FastTx / ADPRO FastVu / ADPRO FastScan and ADPRO V3100 Hybrid. Integration between ADPRO VideoCentral and ADPRO VideoWall delivers seamless operation.

Audio

Integrated listening ability assists the alarm verification process, while transmission of the operator's voice to the site provides instant intruder control.

Video Hard Disk Recording and Printing

Alarm video is automatically saved to hard disk for later recall and image printing.
Key Features

- Video verification of remote alarm events.
- Monitor multiple remote sites across a network.
- Fast display, storage and retrieval of alarm images.
- Carry out virtual guard tours of remote sites.
- Listen or talk to a remote site.
- Individual user access control.
- Control devices such as lights, gates or barriers at remote sites.
- Remotely control PTZ cameras for monitoring or surveillance.
- Database search to recall and display all previous events.
- Automatic operator notification of the absence of site communications.
- Easy to use icons, pull-down menus and wizards for control and administration.
- Remote setup of on-site equipment.
- Database storage of site information with backups and immediate retrieval options.
- ADPRO VideoWall module provides outstanding surveillance capability.*

ADPRO VideoCentral Platinum

Supported Products

ADPRO VideoCentral Platinum is used to monitor ADPRO V3100 Hybrid and other ADPRO remote video recording and transmission devices via software compatability mode.

System Configuration

Single PC

This configuration is typically used by:

- A site owner for self-assessment and surveillance.
- A CMS with a few sites.

Multi PC Systems

Typically used in a monitoring station with multiple concurrent users monitoring multiple sites.

PC Specifications

Recommended Requirements for Multi PC System - Server/Database

- Intel Quad Core or AMD
- Minimum speed - 2.6 GHz
- Main Memory - 4 GB
- HDD 150 GB (SCSI or SATA, 10,000 rpm minimum)
- HDD 1 TB for backup

Video Card / Monitor

- Nvidia GForce 8 or 9 series 512 MB
- 1024 x 768 pixel resolution
- Dual display for Interactive Maps

Minimum Requirements for Single User or Client

- Intel Dual Core or AMD
- Minimum speed - 2.4 GHz
- Main Memory - 2 GB
- HD 320 GB (7,200 rpm minimum)

Video Card / Monitor

- NvidiaG Force 8 or 9 series 512MB
- 1024 x 768 pixel resolution
- Dual display for Interactive Maps

Peripherals/System Requirements

DVD-ROM

Industry standard device (10 x speed or greater).

Mouse/Keyboard

Windows compatible recommended.

Sound Card/Speakers/Microphone

Required if audio capability is to be used.

Communication Devices

Network connectivity via a LAN adaptor supporting 100BaseT or 1000BaseT.

Operating System

Recommend:
- Windows® XP Professional 32 bit (SP3)
- Microsoft Server 2003 (SP2),
- Windows 7 Professional 32bit
- Internet Explorer V7 or greater.

Supported (not for VCG/legacy products):
- VISTA Business 32bit (SP2)

Ordering Information

Model No: VCPSW-1 (software key)
Model No: VCPSW-1-USB (USB dongle)

Note: For connection to legacy products (ADPRO FastTrace, ADPRO FastVu and ADPRO FastScan), please refer to the specifications in the ADPRO VideoCentral Gold datasheet.

* V3100 support will be available in future releases
