

# SYMMETRY™

## GLOBAL v8

Symmetry Global is the ideal choice for organizations spread over a number of geographically dispersed sites. It allows each site to maintain autonomous operation and responsibility for its own security systems, while obtaining benefits from centralized administration, card management and alarm handling.

Symmetry Global not only provides a multi-site organization with the improved efficiency of central card management, but also provides the ideal solution when people require access to more than one site, since one operation can add cards to all the required locations.

Global head office users (dependent upon permission) can define global cardholders, create and add global access rights and configure threat levels on global cards. Global region alarm management and threat level activation can be achieved from head office global clients.

The new functionality of the Symmetry Global architecture provides the ultimate resilience for multi-site applications, since any failure of the corporate network still allows autonomous regional systems to continue full operation at a local level.

### KEY FEATURES

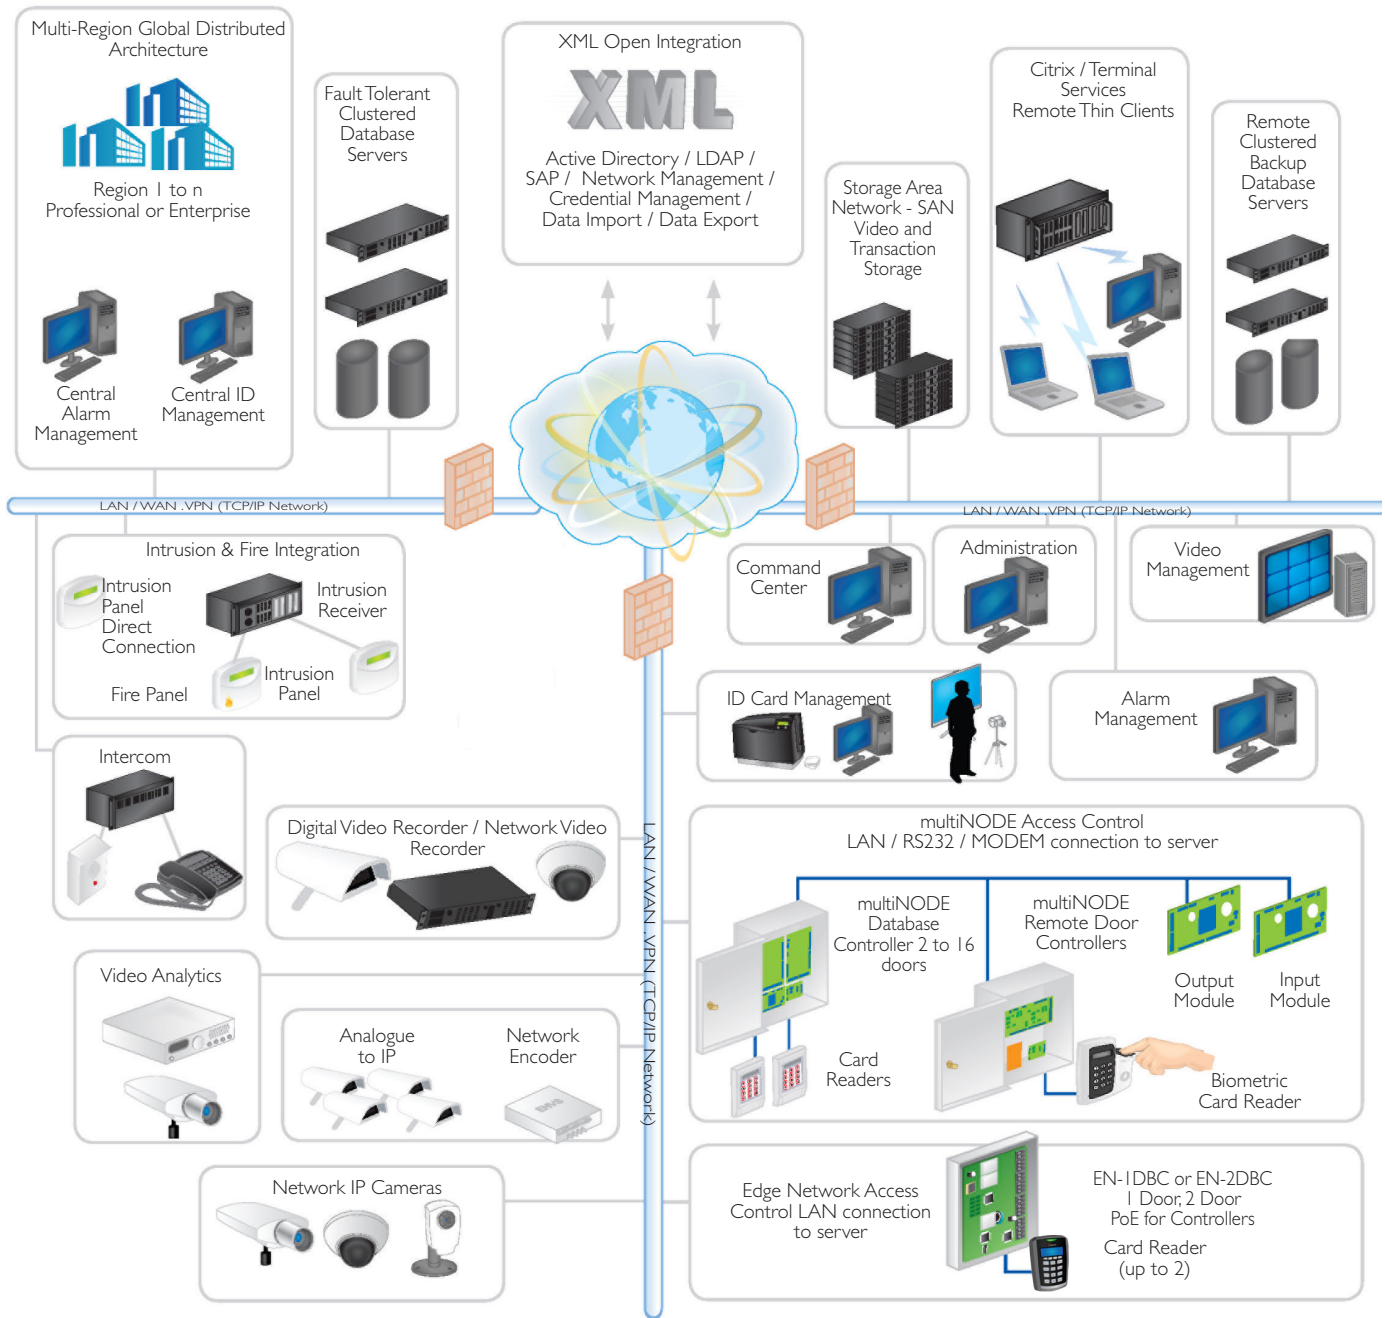

- Scalable security solution for very large or global network applications
- Provides integration of regional systems, each with its own database
- Unrestricted number of clients, workstations, card readers and card holders
- Cost effective control of security across the organization
- Access rights conflict resolution
- Uses the high-performance Microsoft® SQL Server database system
- Each location has control of its own security systems
- Complete resilience to network failure
- Centralized and synchronized card production and administration
- Centralized alarm handling if required
- Additive advance access rights
- Wide range of optional software modules

### OPTIONAL MANAGEMENT SOFTWARE

Software packages offer a range of fully-integrated additional features designed to enhance the system and provide higher levels of flexibility and integration. Optional features include:

- Active Directory single sign-on
- Data Connect Import/Export
- Guard Patrol Management
- Intercom Management
- Intrusion Management
- Muster Management (Safety Roll Call)
- Symmetry Video Management
- SymmetryWEB™
- Threat Level Manager
- Web Access
- Workflow Designer
- XML Open Integration Module
