

AD920A

20-INCH BLACK & WHITE MONITOR

The AD920A is a high quality, high resolution, black and white, 20-inch video monitor that's perfect for security and surveillance applications. The monitor provides crisp, clear, large-screen images that allow you to observe the details in smaller video inset boxes common on quad and multiplexer displays.

The monitor contains a latching power switch, which remains in its set position - either on or off - regardless of incoming power status. Therefore, the monitor does not have to be physically turned back on after a power loss.
