

HD-WS SERIES

Vulcan™ Series 1080P Starlight Windshield Cameras

CAMERA FEATURES ▼

The high-definition HD2500WS and HD3600WS Windshield Cameras capture a wide angle view through the windshield to provide evidence of what really happened on the road. Equipped with a starlight CMOS sensor for exceptional sensitivity to starlight, these windshield cameras capture clearer video at night without using IR lights, which cause glare from the windshield. The starlight windshield camera has a slimline, low profile housing and is mounted to the ceiling of the vehicle using the ADJBRWS adjustable bracket for an optimal view through the windshield (bracket sold separately).

HD-WS STARLIGHT SERIES TECH SPECS ▼
