

EZ-Eight

Complete Access Control System

The **EZ-Eight Series** are complete access control systems designed for fast and easy installation. All required components (software, controller, readers, reader interfaces, UPS, backup battery, enclosure and 2 test cards) are included. **The installer only needs to provide electrical locking devices and cabling to complete the installation.**

Significant price savings are realized due to the packaged kit concept. Three software configurations and 4 reader types allow for 12 different EZ-Eight packages.

The three software options for the EZ-Eight head-end are: APACS Pro, Standard and Lite. The software is easy to configure and use. A pre-configured database is provided for the 8-door system, which allows for quick installation. The database contains the basic setup and allows getting the system up and running in minutes. Installers only needs to adjust the settings according to the requirements of a user, add cards and the system is ready.

The EZ-Eight includes 8 Motorola, Keri or HID proximity readers or Apollo magnetic stripe readers with integral keypads. The system can be easily expanded up to 32 readers by adding readers and reader interfaces. The capacity of the system can be increased to hundreds of readers by adding additional AAN-32 or AAN-100 controllers.

The AAN-32 controller and AIM-4 reader interfaces are mounted in the compact APU-12 enclosure. The APU-12 provides full battery backed up UPS for 8 readers, strikes, controller and interface units. The AIM-4 reader interfaces have 12 supervised auxiliary inputs alarm inputs and 8 outputs. The EZ-One can be used for monitoring of alarms. The system can also be upgraded by adding AIO-168 alarm modules (16 supervised inputs/8 outputs each).

EZ-Eight features:

- Complete 8-door access control system
- Includes 8 card readers
- Easily expandable to 32 readers and more
- RS-232 interface for a printer or PC
- Uninterruptible power supply for entire system

- 0.5A power for each locking device
- Compact 16 x 18 x 5 enclosure fits all components
- 30,000 users with 1MB of RAM (included)
- 8 auxiliary alarm inputs & 8 relay outputs
- AAN-32 32-reader controller included

APACS Software features:

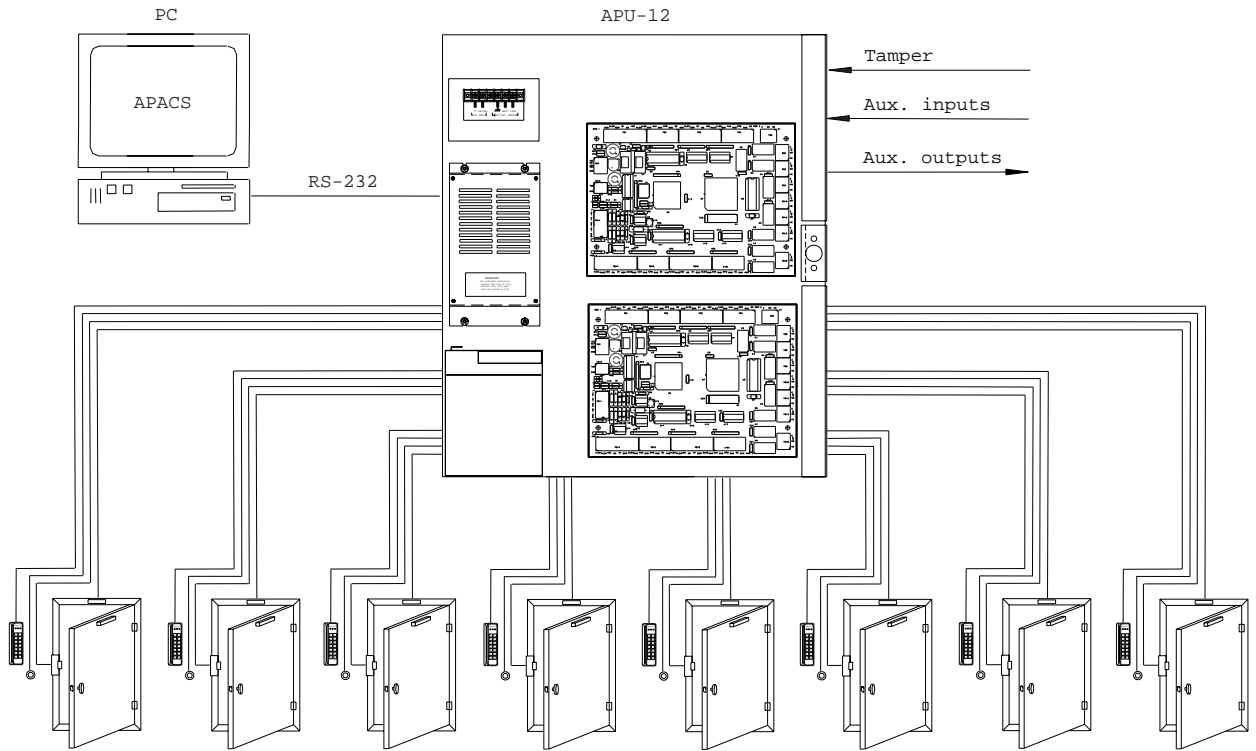

- Text based on-line event display (Lite, Standard, Pro)
- Time and Attendance reports (Lite, Standard, Pro)
- Extensive event reports (Lite, Standard, Pro)
- Elevator Control (Lite, Standard, Pro)
- Graphic maps (Standard, Pro)
- Badge design (Standard, Pro)
- Software linkages: live video verification, CCTV control, audible warnings, paging (Pro)
