

# EV435 AM

## Anti-masking PIR

The EV 435AM is the anti-masking version of the EV 400 Plus series. Utilising a novel method of anti-masking detection involving contoured light guides (patented), the EV 435AM will build on the success of the EV 289 for high security risk applications.

EV 435AM – 16m Vol., NC relay, AM o/p, memory
