PULSE - The digital locking system

Product description

The PULSE desktop reader enables contactless programming of keys and tags for an ASSA ABLOY PULSE locking system. The reader is connected via USB to a computer with Incedo ™ Open software.

With the dektop reader, the administrator handles the daily key authorizations, handing in and handing out keys.

Technical data

	Temperature	0 °C to +55°C
	Connection cable to computer	2 meter
	Connection	USB 2.0 Type A
	Driver	CCID
	Security	Encryption by SEOS
	Buildings	16 Buildings / Systems
	Measurements	71mm x 93mm x 16mm
	Weight	0.1kg

Function overview

- Simple and fast key programming
- Used in an ASSA ABLOY PULSE locking system to program PULSE keys
- Dual frequencies with support for low and high frequency code carriers
- LED light indication
- The unit can belong to 16 simultaneous buildings in one or more ASSA ABLOY PULSE locking systems
- Can revalidate PULSE keys.
- Data upload directly from the PULSE key
- Automatic reading of key ID from PULSE keys.
- Requires the PULSE Desktop Updater software
- Compatible with PC
