

ATM-Keyboard ATM System Keyboard

FEATURES

- Easy to use
- Rugged joystick
- Large, backlit display
- SmartCard protected
- Ergonomic design

OVERVIEW

With over 20 years of expertise in designing CCTV equipment, the Destiny keyboard has been developed with simplicity in mind. Ergonomically designed, the keyboard uses a large backlit display to convey information about the system in the clearest possible terms. Smartcard protected and designed specifically for Baxall systems, the unit connects to the ATM network via the RS422 port on an ATM Decoder. Control of a Pan and Tilt head is achieved using a durable military-standard three axis joystick. This gives the ability for an operator to Pan, Tilt and Zoom with a single hand movement.

SPECIFICATIONS

LCD	CCFL Backlit VGA 100 x 150mm with 11 general purpose soft keys
