

ORION STORAGE SERIES

ECONOMICAL VIDEO STORAGE

BCD-HV-NAS2

KEY FEATURES

CAPACITY UP TO 16TB

TWO-YEAR PARTS WARRANTY

**RAID OPTIONS
RAID 0,1**

HOT SWAPPABLE HDD

VERTICAL MARKETS:

The Orion Storage Series is geared towards the hosted video market where edge recording is essential. This project is perfect for budget conscious projects and small spaces.

When the network includes a WAN (or worse, the Internet), Recording at the Edge becomes the only way to ensure high-quality recordings. Recording at the Edge can be achieved by deploying PC-based DVRs at the edge – but with vulnerable operating systems, these are more challenging to maintain than a simple, purpose-built embedded appliance. The BCD-HV-NAS2 is designed as an edge storage device to be utilized in small deployments.

	CAPACITY	CPU	LAN	OPERATING TEMPERATURE	UPC
BCD-HV-NAS2	16TB	Marvell Armada XP Dual Core 1.066GHz	Gigabit X 1	40°F to 95°F (5°C to 35°C)	857190006103
