

900 Series Audio Door Entry Systems

The 900 Series door entry systems are recognised for their high quality and competitive pricing and are widely accepted as the industry standard. Each system provides all of the components necessary to install a complete audio door entry system; including a surface lock release as standard. These systems are available from a one way (model 901) up to any size.

Model 904

Model 901 boxed

Each 900 series system comprises of:

- model 801 telephone, one for each station
- model SPA front door panel
- model 61 speech unit (model 51 for above 10 ways)
- model 203 surface lock release
- model 212 12VAC PSU (model 225 above 10 stations)
- Full wiring and installation instructions

Model 901 unboxed

The SPA panels supplied in the 900 kits are a popular choice due to their high durability, resistance to corrosion and low cost. These panels are designed with an attractive and contemporary style and are available surface or flush up to 10 ways. The larger panels are of a more classic style and are available flush fitting only.

The model 801 telephone is included as standard in each system. The telephone is manufactured in white and grey high-impact ABS plastic that imparts high durability and complements most wall furnishings. It incorporates a 'lock release' push-button discreetly positioned on the base, and under the handset, to prevent inadvertent use. The Electronic Ringing Tone has a useful safety feature wherein the tone is reduced when the handset is 'off the hook'. With its wide handset the model 801 is especially recommended for the elderly.

For technical specifications and wiring diagrams please use the faxback form on page 40 or visit our website at: www.bellsystem.co.uk

Ordering Information:

Order a model 901 for a complete single station system. For multi-way systems order a model 900 + n, where n is the number of stations, e.g. a model 914 is a complete 14 station system. (On systems above 20 stations please append the code P for inclusion of privacy telephones)

For tradesmen entry facility, simply add TR900 to any given system, e.g. a six station system with trades facility is a model 906 + TR900 (A model TS2000 time clock is included).
