Eventys Pro 32 channel advanced DVMS

The new 32 channel Eventys PRO DVR from Bewator provides a cost effective and powerful digital video management system built with industrial class components.

In line with the 4, 8 and 16 channel Eventys™ Pro models, this new 32 channel unit also has the capability of supporting IP and analogue cameras simultaneously, and includes audio recording, superior motion detection with frame progression technology and advanced search facilities.

The DVR is fitted with 32 video inputs - 32 analogue or 16 IP and 16 analogue - and a DVD writer to increase the amount of Video sequences that can be copied.

This latest model also benefits from 2 main and 2 quad monitor outputs, effectively providing a 32x8 real-time live analogue matrix function.

The DVR is available in a 1TB or 1.6TB capacities with an option for larger external RAID capabilities.

This versatile DVMS is also compatible with Bewator analogue CCTV solutions and offers very powerful system connectivity and remote monitoring capabilities. Recorded video can be duplicated and stored anywhere using standard IT and network storage solutions, resulting in very cost effective, secure, and virtually unlimited storage capacity.
