Security & Access Control Systems

For dependable and affordable access control

PORTICO JUNIOR

Blick is the company you can trust with one of your most important considerations - controlling access to your premises. We have provided businesses with dependable solutions for over 75 years, establishing a reputation for integrity and innovation that still holds true today. Larger, multi-site organisations already enjoy sophisticated access control through our renowned Portico System. Now we have developed Portico Junior specially for smaller to medium sized businesses, providing essential access control facilities for single-site locations.

Portico Junior provides controllable protection

Portico Junior, part of the Portico range, has been introduced specifically for smaller companies, who often run the greatest risk of closure through vandalism and theft, yet need an easily affordable solution. Able to accommodate up to 2,000 users and control from 4 to 32 doors, Portico Junior gives you flexible control, with varying levels of access across your site. For example, you can restrict access through specific doors to certain times. With Blick Portico Junior, neither your workforce nor your security is compromised.

More options for maximum flexibility

The numerous options available with Portico Junior allow you to tailor your system specifically to your needs. With single or dual channel readers, you can control both entry and exit through doors. You can have readers that are purpose-designed for internal or external usage. And you can specify different ID devices to suit the people who will use them - both staff and visitors. With Portico Junior, you're always the one in command.

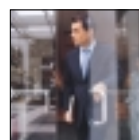

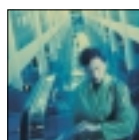

Effective Access Control is vital to your future

It's a sad fact that business crime continues to increase, particularly in the areas of employee theft and fraud. No organisation can afford to ignore this trend, especially smaller companies which are more vulnerable to being forced out of business by crime. To tackle business crime effectively, you need to ensure tight security through proper access control. By monitoring and restricting who goes where on your premises, and when, helps to prevent and deter theft. Blick has a simple and successful solution to help you achieve this - Portico Junior.

Portico Junior control panel

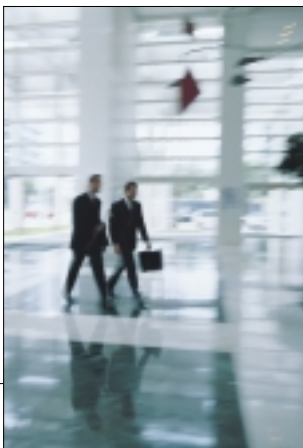

Portico Junior for Windows™ gives you even closer control

This easy to use software package gives you full management control over a network of up to 8 controllers across your site. Administration is made easier, since you can change access profiles and add or delete authorised users from a single point.

Using Portico Junior for Windows™, you can easily alter your standard access levels to accommodate special considerations, such as setting periods of validity for temporary or contracted labour, whilst ensuring different members of permanent staff have indefinite access during office hours. You can also set visitors' passes to be valid only on the current day. With Blick and Portico Junior you enjoy sophistication, without complication.

Valuable tracking and reporting features

If there's a breach in security you'll want to know how and when it happened - and you can rely on Portico Junior for Windows™ to tell you. Amongst its many reporting functions, the system raises an alarm when doors are left open or for an anti-passback error (when an attempt has been made to reuse a pass that has already allowed one individual to gain entry). In addition, you can choose to view access transactions by dates or daily time slot, whether access was allowed or denied and the record of movements at any particular access point. This information will help you plan for efficient movement throughout your site. You can also see at a glance who is allowed to go where and view the access record of any individual. If you're unfortunate enough to suffer theft or vandalism, the reporting functions of Portico Junior for Windows™ will make it easier to trace the suspects.

Part of a powerful security line-up

Blick Portico Junior complements many other products from our extensive Security & On-site Communications portfolio. When you choose Blick, you're investing in an infinitely adaptable range of on-site support systems and services that can be expanded and adapted to suit your changing needs.

Ensure peace of mind, with Service Select

Since you're depending on Blick Portico Junior for your security, it makes sense to ensure that it always works at optimum efficiency by opting for Blick Service Select, our total customer care programme. Service Select lets you choose the response time and the service provision to suit your needs, from a range of contracts that give you access to our advice and service up to 24 hours a day, 365 days a year. You'll be guaranteed of the highest standards of service, confirmed by BS EN ISO 9002 quality assurance and our membership of BSIA.

Flexible finance options too

To suit your business budget, we offer the options of outright purchase or rental, which can also cover your Service Select contract.

Choose Portico Junior for greater security with flexibility

Portico Junior brings you the benefit of improved security and flexible, responsive control across your site. By preventing and deterring crime, it could soon pay for itself, as well as giving you peace of mind that's priceless. Now that you've built up your business, give it the protection it deserves, with Blick Portico Junior.
