## GENERAL DESCRIPTION

The **BN2035IRIP** is a Hybrid bullet camera (IP and analog), with the best characteristics for indoor and outdoor installations thanks to its IP66 protection. Thanks to its design and compact size this bullet camera becomes a favorite and highly required device for multiple applications. The **BN2035IRIP** shares with all **iPac** devices the H.264 compression standard, which guarantees a good codification of images with the best quality, the optimization of the storage and compatibility with windows media player. Its hybrid characteristic allows remote video surveillance and local configuration. Last, the **ONVIF** protocol offers all **iPac** devices the best compatibility and performance with different software applications. IPac line of products is complemented with our Network Video Management Solution license free and that allows managing and recording.

The **iPacWD** cameras have been developed to full fill all the requirements needed to provide the best quality images. With **PIXIM Digital Signal Processor, Seawolf**, all images are processed all digital end to end. Besides, with WDR function, this line of cameras provides all data needed with **the best quality images, detail and more accurate color** avoiding "camera blindness": commonly encountered in high-contrast scenes. The image quality is also maintained defeating fluorescent flicker issues. The fact of providing cleaner images results, additionally in a more efficient video compression.
