

SmartDraw™ DATA SHEET

SMARTDRAW is a Windows based software drawing package that is easy to use and get started with but has many useful features once you are familiar with it. Our symbols and images software packages require SmartDraw to be installed on your PC. You can purchase SmartDraw at the same time as you purchase the Symbols and Images software.

The professional SMARTDRAW package contains a small sample of our pre-configured CCTV, Access control or Security specific symbols. It comes with symbols for map drawing, network, flowcharts and organisational charts.

SMARTDRAW is available in two versions

Standard- SmartDraw standard includes all the features found in the free Trial Edition (but with no time limit) PLUS the standard set of over 1000 symbols and example drawings in all areas

Professional- SmartDraw Professional contains all the standard features and symbols, plus these great extras, Spelling checker (in 9 languages), advanced import and export filters, full integration with MS Office, plus the Business & Charting collection – with over 1100 additional symbols and templates for flowcharts, org charts, forms and more.
