- \* **900mm Long**
- \* **Changeover Microswitch**
- \* **3 Amp Contacts**
- \* **Dogging Key Included**
- \* **Satin Anodised Aluminium**
- \* **Other Finishes Optional**
- \* **Full Fitting Kit**
- \* **High Quality Carriage**
- \* **1 Year Warranty**

The MSPB is a high quality microswitched push bar. Manufactured in SAA with a robust microswitch, the unit can equally switch an electric strike or magnetic lock. The MSPB is supplied standard in SAA, but other finishes can be provided upon request. A dogging key is provided in the kit to allow the bar to be "locked off" in the open position. It is possible to cut the unit down to fit narrow style doors, it is recommended that this should not reduce the bar length to less than 680mm.

**Product Code**

MSPB

**Description**
