AC2000 Lite
Software Only Virtual Kit

Features that make a difference:

- Virtualised AC2000 Lite

- No need to install dedicated AC2000 Lite System Server hardware

- Flexible backup functionality, keep copies of the AC2000 Lite virtual image file

- Automatically installs the virtual environment and the AC2000 Lite software

- No additional configuration needed

- No licence fees required

The AC2000 Lite Software Only Virtual Kit option allows users to run the complete AC2000 Lite access control system within a virtual environment, running on a Windows® 7 PC.

AC2000 Lite Software Only Virtual Kit is supplied as two CDs; one for the AC2000 Lite Workstation and one for the virtual AC2000 Lite System Server which is a preinstalled and pre-configured VirtualBox® virtual image.

Oracle® VM VirtualBox is installed on an existing Microsoft Windows 7 host operating system as an application; this host application allows a guest operating system such as AC2000 Lite Virtual System Server, to be loaded and run within its own virtual environment.

Benefits
- Virtualised AC2000 Lite System Server
- Runs on a dedicated or mission critical Windows 7 PC platform
- Single box solution: AC2000 Lite System Server can be installed on the same PC as the AC2000 Lite Workstation

- Installation procedure automatically configures and installs the VirtualBox environment along with the AC2000 Lite software
- No need for extra configuration or specialist knowledge of VirtualBox environment
- Keep a copy of the AC2000 Lite virtual image for quick backup and restore in the event of failure.

AC2000 Lite is still available using the current System Server hardware if required.

Requirements
- AC2000 Lite v6.7 software & upwards

Recommended PC Requirements
- Intel Core i5-3470
- Windows 7 (32 bit & 64bit)
- 4GB RAM
- 16x DVD/RW
- Radeon HD 7470 1GB Graphics
- 250GB HDD
