Part Number: CK-BLUE2

CAW	Version 8.0	Version 9.0 (or newer)
Enterprise	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Basic	<input type="checkbox"/>	<input type="checkbox"/>

The CyberKey Blue 2 is an electronic key used to operate CyberLock cylinders. It has memory that contains encrypted access codes, a list of locks it may access, schedules of authorized dates and times it may access locks, and a begin-end date range during which the key will operate. The battery from a CyberKey energizes the electronics within a CyberLock cylinder.

The dual-mode Bluetooth technology extends battery life and allows users to update access permissions on the go using an Android or iOS app and smartphone.

### Specifications

<b>Physical</b>	Fiberglass reinforced nylon, replaceable brass tip
