FlashLock access ess, schedules which the key

The CyberKey Blue 3 is an electronic key used to operate CyberLock cylinders and FlashLock access points. It has memory that contains encrypted access codes, a list of locks it may access, schedules of authorized dates and times it may access locks, and a begin-end date range during which the key will operate. The battery from a CyberKey energizes the electronics within a CyberLock cylinder.

The Bluetooth 5.0 is activated with the push of a button and allows users to update access permissions on the go using an Android or iOS app. CyberKey Blue 3 has a convenient micro-USB port for charging on the go.
