

DH-HAC-ME1400B-PIR

4MP HDCVI MotionEye Camera

HDCVI

- · Max 30fps@4MP
- · HD and SD output switchable
- · 2.8mm fixed lens
- · 10m/110° detecting range/angle
- · Quaternionic digital sensor
- · Max. IR length 20m, Smart IR
- · IP67, DC12V

System Overview

The MotionEye product is an indoor / outdoor dual detection video camera, designed for applications where video verification of intrusion alarms is necessary or desired. By incorporating an infrared sensor into the 4MP camera, both motion detection and PIR detection are used to reduce false alarms and keep you acquire accurate and effective alarm informations in real time.

Functions

Wide Detection Range

Designed with Fresnel lens, the PIR of MotionEye is able to cover wide monitoring range with horizontal angle of view up to 110° within a distance from 2m to 10m.

Dual Detection

The detection accuracy is well guaranteed with both motion detection and PIR detection, which can eliminate the number of false alarms you receive. With the advantage of dual detection technology, your HDD will now last longer and not be recorded with false alarms. Gone are the days of alarms caused by heavy wind or rain. Instead, only true threats will instantly trigger an alarm and allow you to protect your loved ones.

Long Distance Transmission

HDCVI technology guarantees long-distance and real-time transmission without any loss. It supports up to 700m for 4MP HD video via coaxial cable, and up to 300m via UTP cable*.

*Actual results verified by real-scene testing in Dahua's test laboratory.

HD/SD Switchable(Video Only)

The camera supports switchable HDCVI high definition video output and CVBS standard definition video output. The two formats can be switched over through OSD menu. This feature makes the camera to be compatible with both HCVRs and existing analog DVRs and also facilitates debugging through analog testers

Smart IR

The camera is designed with array LED IR illumination for best lowlight performance. Smart IR is a technology to ensure brightness uniformity in B/W image under low illumination. Dahua's unique Smart IR adjusts to the intensity of camera's infrared LEDs to compensate for the distance of an object, and prevents IR LEDs from overexposing images as the object come closer to the camera.

Protection

The camera's outstanding reliability is unsurpassed due to its rugged design. The camera is protected against water and dust with IP67, making it suitable for indoor or outdoor environments.

With PIR working temperature range of-10 °C to +50 °C (+14 °F to +122 °F), the MotionEye is designed for extreme temperature environments.

Supporting ±30% input voltage tolerance, this camera suits even the most unstable power supply conditions. Its 4KV lightning rating provides protection against the camera and its structure from the effects of lightning.
