

# DMVC Server Enterprise

Server Software for DMVC App, Unlimited Clients & Recorders, HD

**DMVC  
Server  
Enterprise**

**DMVC Server Enterprise** is a video server software for the connection of a local network consisting of multiple Dallmeier recording systems to the Internet using a joint external IP address. Together with the smartphone application **DMVC App**, all live images or recordings can be accessed over 3G/UMTS or WiFi without reference to time and place.

The software **DMVC Server Enterprise** can be installed and operated on an office PC with standard up-to-date hardware. The integrated graphic user interface allows for a fast and easy configuration. Due to the **integrated camera management**, it is possible to combine various cameras into **virtual recording systems**. In addition to the integrated user administration and authorisation/rights management, using the client whitelist function ensures a personalized and abuse-protected access to the connected Dallmeier recording systems.

The number of simultaneously accessing **DMVC App Clients** is not limited and, therefore, only restricted by the **available bandwidth**. Similarly, with the according **license**, the number of connected **recorders** is unlimited as well, and only restricted by the used **hardware**.

## Features

- Unlimited simultaneous access of **clients**
- Unlimited connection of **recorders** (depending on license and hardware)
- Supports **HD cameras**
- Only one IP address required due to the **routing** function
- Integrated **user management** and **client whitelist**
- Integrated **camera management**
- Suitable for Dallmeier recorders **without PRemote**<sup>1)</sup>
- Suitable for Dallmeier recorders as of version 7.1.0<sup>1)</sup>

## System Requirements

- Operating system Windows\* 7 or 10 (64 Bit)
- Intel QuadCore 2.33 GHz CPU (or comparable)
- 2 GB memory
- 100/1000 Mbps Ethernet interface
