

DATACARD® TRU™ SIGNATURE SOLUTION

EASY-TO-USE TECHNOLOGY FOR DIGITAL SIGNATURE CAPTURE

The Datacard® Tru™ signature solution makes it easy to capture any user's signature electronically and incorporate it into a photo ID for an additional layer of security.

- **High-quality capture.** The electronic signature pad and tethered writing stylus ensure consistent, accurate digital capture so you can count on the same outstanding results every time. An integrated, interactive LCD allows users to see their signature as they sign, which helps prevent errors.
- **Complete solution.** In addition to the signature pad and stylus, the Tru signature solution also includes Datacard® Tru™ signature software for seamless integration with Datacard® ID Works® identification software or Datacard® ViaNet® identity information software.
- **Full functionality.** Use the Tru signature solution for fast, high-quality capture as well as digital archiving or printing of electronic signatures. With the added power of ID Works software, you can easily manage and control your entire electronic signature database with one convenient solution.

Accurate digital signature capture

The fully integrated Tru Signature solution includes everything you need to capture, store or print electronic signatures:

- Datacard Tru signature software — integrates easily with ID Works identification software and ViaNet identity information software
- Signature pad hardware with interactive LCD
- Tethered writing stylus
- USB interface
- Complete documentation

DatacardGroup
