

Dennard 880/883

DENNARD 880/883 INFRA-RED ILLUMINATOR

The type 880 and 883 microlights have been designed to provide a low power, low cost, high performance infra red illuminator, at a size complementing C.C.D camera equipment. The units are constructed from aluminium alloy, powder coated and stoved with stainless fixings.

Average lamp life is 2000 hours with specially modified 12V 50mm tungsten halogen lamps. Replacement lamps obtainable only from Dedicated Micros.

The type 880 is supplied with a 50W lamp. The type 883 is fitted with a 75W lamp. Both illuminator types are available with spot or flood lamps and a choice of 715nm or 830nm dichroic filters.

Note: When fitting replacement lamps care must be taken not to touch the filament envelope or reflective inner face as this will be detrimental to the lamp life.
