WS4939

Add wireless convenience and value to any DSC security system with the **WS4939 four-button wireless key**. Utilizing DSC's unique wireless technology and the latest production techniques, the WS4939 incorporates new features and benefits into a sleek design that is compact and user-friendly. Users enjoy a sense of control over their security systems and the added confidence that comes with portable personal protection.

If effective security is centered on providing end-users with protection suitable to their needs and lifestyle, why can't it also be a means for personal expression? That's why DSC offers the WS4939 with optional designer cases available in eight stylish colors. Rubber button inserts that display standard icons (arm away, arm stay, disarm and panic) are also included and come in either blue or black, depending on the color of the designer case.

WS4939 Four-Button Wireless Key with Optional Designer Cases

Committed To False Alarm Reduction

False alarm reduction has resulted in the introduction of activation delays that require users to press and hold a button for a period of time before its function is initiated. For example, to trigger the arm/disarm function you must press and hold the appropriate button for one second, and for the panic alert, three seconds.

A red LED indicator on the WS4939 flashes to indicate that a transmission has been sent to the security system. The LED indicator activates only after the necessary delays have expired.

Control

The WS4939 can be used to arm/disarm security systems from a distance, be programmed to trigger garage door openers, turn on lights, open powered gates, or trigger panic alarms.

Ordering Information:

WS4939NA	4-Button Wireless Key
WS4939EU	4-Button Wireless Key
WS4939DC-BLK/BLU	Marbled Black and Blue Designer Case
WS4939DC-METBLU	Metallic Blue Designer Case

Optional generic rubber insert included.

Versatile

A multi-function clip allows the wireless key to be clipped to a convenient location, whether it's on a belt or car visor. The WS4939 wireless key is built with reliable 433 MHz technology, uses long-life lithium batteries and is compatible with all current DSC wireless receivers.

For those not using the default settings, the three-second delay on the panic alert can be removed. A generic rubber button insert without the standard icons is included and can easily be inserted.

Compatibility

The WS4939 is compatible with the following receivers:

MAXSYS® Wireless Receiver PC4164-433

PowerSeries™ Wireless Receivers
PC5132-433 and RF5108-433

Fixed-Message LCD Keypad with Integrated
Wireless Receiver RF5501-433

Envoy™ LCD Self-Contained Wireless
Security System NT9005
