

## VEGA/2 Indoor Varifocal Colour Dome Camera

**ernitec**

### ***Description:***

When a discrete high-end camera is required for demanding application, the Vega2 camera is the right choice. Instead of mounting an ordinary camera with varifocal lens and bracket, this is the solution, because it simply replaces all this. You mount this compact camera on the wall or in the ceiling, apply 12VDC/24VAC to it and connect the video, then you are ready to point the camera to the required direction and adjust the viewing angle that suits the purpose, and you then are off to the next job. It cannot be simpler than that, yet the camera still provides excellent picture quality. Available with two different lenses (2.5-6 mm or 2.9-10 mm).
