Professional color monitor for video surveillance

## Product information

The GCVM series of colour monitors from GEUTEBRÜCK in their robust, metal housings, are exceptionally suitable for use in video central monitoring stations. Their high resolution lets you keep a close eye on every monitoring situation. Their technical specifications meet the highest demands, yet at the same time they offer the best possible price/performance ratio. Thanks to their automatic switching between PAL and NTSC and their integrated wide range power supply units, the monitors are also ready for international application. The series has two selectable video inputs which can be looped through, and these, together with an additional Y/C video input, permit maximum flexibility of installation.

- | Setup via on screen display
- | High resolution of 800 TVL
- | Stable metal sheet housing
- | Wide range power supply
- | Additional Y/C and audio input
