

SIMPLY SECURE

Features

- 12 detection zones, expandable to 36 zones
- 3 setting options for user convenience – FULL set, PART set and NIGHT set
- Up to 8 different user codes for family or staff members
- Up to 4 keypads per system
 - LOW COST ICON/LED
 - LCD
 - FULL TEXT
 - FULL TEXT PROXIMITY
- Up to 8 keyfobs or keytags for remote setting and unsetting
 - RF fob one touch – set/part set/unset
 - Proximity tags for easy set/unset without using codes

Benefits

Wireless installation options

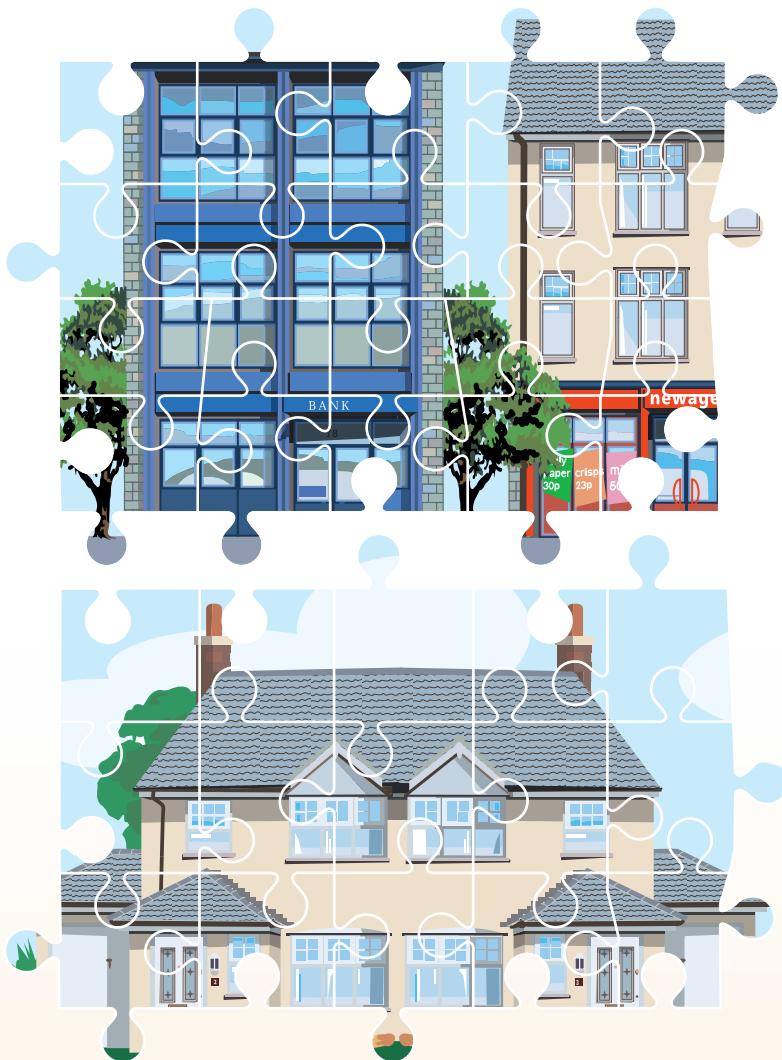

- A less intrusive installation option
- No additional cabling to protect detached buildings and mobile units
- Use of 868MHz frequency with FM transmission provides a strong, clean signal on an uncongested band
- Hybrid expansion options – wired and wireless

Maintenance and operational

- 250 event alarm memory for recording system time and date stamped activation details – including full text reports
- Digital communicator sends activation information to the Alarm Receiving Centre (ARC)
- Supports computer based, remote servicing package that enables the system to be checked, serviced or reset without the need for an engineer to visit the premises

receiver keypad*	2012-171

* available after October/November 2003

Downloader Software

(runs on a Windows™ PC with suitable modem fitted)

Part Number	
Downloader Software	2011-180

In accordance with the policy on police response, adopted by the Association of Chief Police Officers in 2001 and implemented alongside the British Standard Institute's DD243:2002 which specifies intruder alarm installation criteria, the Ademco Microtech Galant control panels can provide confirmed alarm technology. Where installed, the correct registration and use of this technology will qualify premises for police response to activations.
