Integrated security system

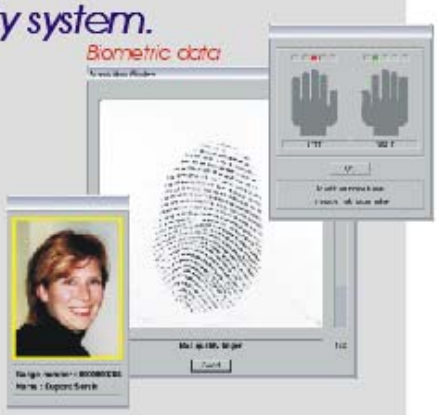
NEW MANAGEMENT SOFTWARE

A new milestone for IDCS and a revolution in user friendly security management: "Integrated Video & Security management software" for the S2000 integrated security system.

Alarm client application

Graphical viewer application

Biometric data

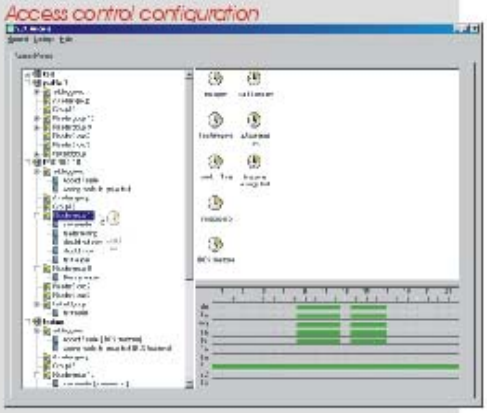


Badge client application

- INVISE CLIENT APPLICATION (Blue Icons)
- INVISE CONFIGURATION APPLICATION (Green Icons)
- INVISE SERVICES (Background applications (Purple Icons))

- Object oriented design
- Seamless integration with IP-Video
- Real time alarm "state" monitoring
- Flexible interfacing opportunities (through GateWay Plug-ins)
- Enhanced graphical plan viewer & editor with simplified "Alarm System" programming
- Optional data linked with badges (Biometrics, ...)
- Full "drag & drop" time zone management
- Application tracking
- INVISE server redundancy

Access control configuration



Product launch at Ifsec 2004 - NEC Birmingham UK - 10-13/05/2004 - stand J71 - Hall 6

Industriezone "De Roode Berg"
Hellebeemden 9
B 3500 - HASSELT / BELGIUM

BIOMETRIC IDENTIFICATION

IDCS, known as pioneer in integration of the newest technology into security systems, introduces the first access control system based on Biometric Identification.

Indoor model

- Integrated biometric and badge database
- Common data network
- Protected enrollment
- Link multiple biometric templates to one person
- Templates stored in reader or on Mifare card
- Secure and alarm controlled IP communication

outdoor model (IP65)

Product launch at Ifsec 2004 - NEC Birmingham UK - 10-13/05/2004 - stand J71 - Hall 6
