

The ISONAS PowerNet Pigtail Cable

Benefits:

- Speeds up installation, by allowing pre-wiring to be done prior to the installation of the actual reader-controllers
- Available in multiple lengths
- Attaches to the reader-controller with a simple 12 Pin Snap-in MOLEX connector
- Jacketed cable for protection and improved cable pulls.
- 12 Conductor cable, 22 AWG wires
- Cable jacket pre-stripped for connections to the door's components.
- Being detachable simplifies the system's maintenance and troubleshooting.

The PowerNet reader-controller is designed to make the installer's job easier and quicker. One important feature in this regard is the detachable Pigtail Cable. This feature allows you to select the cable length that best matches the installation's needs. Once the door wiring has been completed, the reader is easily connected to the Pigtail. Being able to quickly disconnect and reconnect the reader-controller simplifies troubleshooting and maintenance of the ISONAS system.

Cable Length Options:

Part Number	Cable Length
CABLE-POWERNET-4	Four (4) foot
CABLE-POWERNET-10	Ten (10) foot
CABLE-POWERNET-25	Twenty Five (25) foot
