

Web-based interface for your access control system

Keyscan's Aurora Web interface allows you to manage your Keyscan access control system from any web-enabled computer, laptop, tablet or mobile phone. Perform updates and maintenance tasks using the Aurora Web Client's available functions from the comfort of wherever you may be located. It is the ideal solution for those who need, or want, true mobility and remote access.

The Aurora Web interface (part number: AUR-WEB) is an add-on software module used in conjunction with Keyscan Aurora access control management software version 1.0.9.5 or higher.

The Keyscan Aurora Web interface gives you access to People, Sites, Status and Report portals of your access control software.

AUR-WEB Home Page

Manage People

Keyscan Aurora Web allows you to manage your data, perform searches and list your results.

- Create, edit and delete people records
- Add, edit or delete credential information
- Schedule, manage or view visit appointments
- Assign credentials to groups for door and elevator floor access

Schedules

Keyscan Aurora Web allows you to work with schedules.

- Create, edit or delete schedules for regulating access times
- Assign groups to doors/elevator floors and schedules

System Status

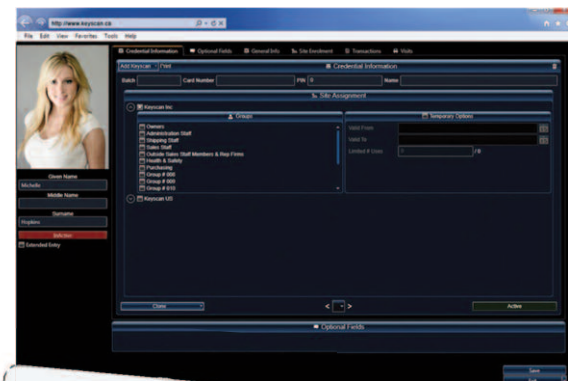

Keyscan Aurora Web allows you to view the status of your system.

- View door status with override functions – lock, unlock, pulse and timed unlock
- View elevator floor status with override functions – secure, unsecure, timed unsecure
- View online transactions for site activity

Reports

Use Keyscan Aurora Web to generate transaction reports.

- Format a user-defined transaction report on all or select site activity

Cardholder Management

AUR-WEB
