

Command Enterprise Bundle

A plug-and-play enterprise VMS solution that supports up to 100 recorders and requires just one Command Enterprise Base License

For medium to large deployments (including multi-site installations and environments with multiple recording servers and recorder platforms), the **CES Bundle** delivers enterprise system management and health monitoring for up to 100 recorders. Powered by Dell®, the server comes pre-installed with March Networks® Command™ Enterprise software, providing customers with a single interface to manage their entire video surveillance infrastructure.

Key Benefits

- ▼ **Bundled solution.** Instead of ordering and installing the various components separately, you can recognize the convenience and time savings associated with the one-stop ordering and support process.
- ▼ **Integrated, plug-and-play operation.** The operating system and video management software are pre-installed and pre-tested, which saves your organization time and reduces deployment costs. The CES Bundle is certified for plug-and-play operation and optimum performance out-of-the-box.
- ▼ **Easy system setup.** The LDAP/Windows Active Directory integration and the fully customizable system topology and Windows Explorer navigation make it quick and easy to set up the system.
- ▼ **Mass management.** You'll get all the tools you need to quickly push out configurations, new firmware, and device settings. Save time with features like recorder configuration import/export, camera firmware mass management, recorder device discovery, and central license management.
- ▼ **Central health monitoring.** Command Enterprise makes it easy to keep all of your devices working optimally. The software sends alerts about camera disconnections, recording or disk issues, high processor or fan temperatures, and other potential problems, before the surveillance system is compromised.
- ▼ **Competitive warranty.** The bundle is protected by a three-year warranty which offers next business day, on-site hardware support.

*Get certified support for up to
100 recorders with next business day
on-site hardware support for three years.*

Command Enterprise Bundle

SERVER SPECIFICATIONS

Max Number of Recording Servers	100
Operating System	Microsoft Windows Server 2012 R2
