

# VA5 IR 360° Camera

Rugged 5MP IR 360° camera with built-in de-warping, video analytics and microphone

ONVIF | SGT

March Networks presents the **VA5 IR 360° Camera**, a cutting-edge solution that provides a complete 360 degree field of view, ensuring complete situational awareness. Equipped with built-in infrared lighting, this camera enables clear vision even in low-light conditions, while its image correction capabilities allow for accurate and distortion-free visuals. In addition, the VA5 IR 360° Camera boasts a built-in microphone that allows for the recording of ambient noises and sounds and is encased in a robust IK10/IP66 housing, offering protection from vandals and environmental elements. Experience a rapid and effortless setup with the camera's simplified installation process, requiring just a single cable.

The camera features a set of powerful video analytics, including tripwire, intrusion detection, loitering detection, object removal, and abandoned object. Video analytics enable organizations to enhance security in both public and private spaces by detecting perimeter or area breaches, unattended objects, and unusual activity more rapidly and consistently. The software detects camera tampering in real time and also promotes more proactive system maintenance by alerting staff to camera obstructions or changes in camera positioning which otherwise go unnoticed.

## Key Benefits

### ▼ Built-In Video Analytics

- **Abandoned Object** - an alarm is triggered if an object remains in one spot for too long.
- **Loitering Detection** - an alarm is triggered when people remain in an area for too long.
- **Tripwire** - an alarm is triggered when a person or object crosses the defined line.
- **Intrusion Detection** - an alarm is triggered when people or vehicles enter a specific area.
- **Object Removal** - an alarm is triggered if an object is removed from an area.

### ▼ Built-in microphone.

No need to purchase and install a separate device for applications that require audio.

### ▼ De-warped viewing modes.

Easily cover four different scenes in a single stream by using the quad view or cover an entire area with a fisheye 360° view.

### ▼ Smart IR Illumination.

The built-in LEDs provide uniform illumination in total darkness, which means users will see high-quality, low-noise video from over 30 feet away. The camera automatically adjusts the intensity of the LEDs to compensate for the distance of an object, so the object is not overexposed when it gets too close to the camera.

*Achieve 360 degree surveillance  
with a rugged camera equipped with IR capability*
