

# M1000

## Flexible, intelligent, hard working

### The latest generation of Menvier M Series alarm systems

The new range of Menvier M Series alarms takes the range's well-established reputation for combining advanced technology with reliability and ease of use to a new level.

Naturally, your new system meets all EU legislative requirements and complies with insurance industry and local police standards.

Moreover, it's designed for maximum flexibility.

You can operate it from anywhere in your property via multiple control panels and it can be programmed to monitor different rooms at different times (discuss your requirements with your installer). And should you extend or change the use of your property, you'll find it can easily be adapted.

You can even choose to have a unique personal proximity tag that recognises your presence, saving you from having to remember a PIN. This intelligent feature eliminates any risk of an intruder guessing or working out a number.

Equally importantly, your Menvier M Series alarm system keeps on working when less advanced systems stop. Its standby batteries are constantly recharged to give at least 12 hours operation in the event of a power failure. And its duplex modem enables your installer to carry out routine maintenance and programme upgrades remotely.

Flexible. Intelligent. Hard working.

The reasons your professional security provider has recommended a Menvier M Series Grade 3 alarm system to protect your property. And why you can look forward to years of effective, efficient operation.

**THE M SERIES**

M1000 Grade 3 Panel, 8-144 zones, Integral Communications

PD6662:2004 Grade	Grade 3, Environmental Class II
On-board Zones	8
Expandable To	144
Zone Wiring options	CC, FSL(variable resistances), iD Plus (via iD Plus Nodes)
Part Sets	4
Wards	8
Max. Number of Remote Keypads	68
Remote Keypad Types	MNETLCD, MKP1, MKP2
