FLEXIBILITY

TS400/410/TSD402

Menvier Security.
**The most technically
advanced intruder
alarm solution.**

Menvier Security is a leading brand of Cooper Security Ltd, part of Cooper Industries who employ over 28,000 people in 100 manufacturing sites around the world.

Menvier Security has more than 20 years experience as a leading manufacturer of security systems for domestic and commercial premises, all of which exceed stringent industry standards.

Professional security alarm installers recommend Menvier Security because they know it represents excellence in technology, unfailing reliability and tremendous possibilities for expanding the system.

For the most comprehensive approach to security, don't make it difficult, make it Menvier Security.

MENVER SECURITY TS400/410/TSD402

The TS400 range from Menvier Security provides comprehensive protection for both domestic and small business premises. In contrast to the TS400's sophisticated operations, it is easy to programme. With excellent flexibility and control, it offers the highest levels of protection from intruders.

Flexibility for growth

The TS400/TS410/TSD402 have been designed specifically to meet the needs of the home or the small business set up. The system offers up to 5 programmable zones plus final exit. Individual zones are capable of monitoring fire, personal attack, intruder and an optional keyswitch which can be used to set and unset your system.

Flexibility in control

Setting the system couldn't be easier, simply enter the first 2 digits of your passcode followed by the 'home' or 'away' button to set, or enter the full 4 digit code to unset. Alternatively the simple keyswitch option allows you to part-set or full set the system. You also have the option to connect up to four remote keypads allowing total control in different parts of the building.

Flexibility in detail

Part-setting is a useful feature that allows you to secure parts of your premises while permitting free access in other parts. For example, this can be particularly useful with the downstairs of a residence being set during the night or the perimeter of the house and garage while everyone is watching TV.

Flexibility for the family

Security code numbers for access to domestic or small business premises should be kept to a minimum. The TS400 allows up to two separate passcodes. The system can be enhanced by connecting the SD1+ Speech Dialler or simply opting for the TSD402 which offers all the features of the TS400 and includes an integral Speech Dialler and 16 character LCD display. The Speech Dialler uses the telephone line to inform third parties of an alarm situation, allowing for up to 60 seconds of re-usable message recording time.

Ask your installer

An alarm system is one of the most effective ways to protect your home and family against burglary. When choosing and installing an alarm system it is essential that it is fitted by a reputable installation company working to recognised industry standards. The TS400 system conforms to all relevant industry standards.
