XProtect® Screen Recorder

The XProtect Screen Recorder is a function that enables Milestone XProtect IP video management software (VMS) to inconspicuously capture screen recordings of any Windows-based PC or point-of-sale terminal. Captured screen recordings are managed in the same way as video (camera) data in the XProtect VMS. This feature helps manage loss and fraud by monitoring the use of business systems and documenting customer transactions.

XProtect Screen Recorder improves efficiency by allowing you to audit staff activities and conduct training and education. The XProtect Screen Recorder works seamlessly with all Milestone XProtect VMS products. XProtect Screen Recorder is easily installed on PCs that should be monitored, and recordings are not only managed by the XProtect software but are also fully synchronized with other video data. This useful tool is helpful in a wide array of industries that handle critical data, such as retail, banking and gaming.

The XProtect Screen Recorder monitors desktop activity and improves operations:

- Easily create evidence – captured screen recordings of transactions provide an account of fraudulent activities
- Increase productivity – monitor critical activities to ensure operations are running efficiently
- Help manage staff – supervise multiple computer screens, including activities on the XProtect Smart Client
- Improve training – use recordings to educate staff and evaluate their user behavior/activity

Add-on to Milestone XProtect VMS Platforms

XProtect Screen Recorder is an add-on product that works seamlessly with all Milestone XProtect VMS products. Captured screen recordings are managed just like camera recordings in the XProtect Smart Client. Therefore, recordings can be viewed in live and playback mode, bookmarked and exported for evidence.

System Requirements

The XProtect Screen Recorder can be deployed on Windows-based PCs, including windows-based point-of-sale terminals and cash registers:

- Client operating systems: Microsoft® Windows® XP, or more recent
- Server operating systems: Microsoft Windows Server 2003, or more recent

- Inconspicuous monitoring of point-of-sales and PCs
- Multi-screen recording
- Easily configure recording quality and frame rate
- Compatible with all major Windows versions

About Milestone Systems

Founded in 1998, Milestone Systems is the global industry leader in open platform IP video management software. The XProtect platform delivers powerful surveillance that is easy to manage, reliable and proven in thousands of customer installations around the world. With support for the widest choice in network hardware and integration with other systems, XProtect provides world-leading solutions to 'video enable' organizations – managing risks, protecting people and assets, optimizing processes and reducing costs. Milestone software is sold through authorized and certified partners. For more information, visit: www.milestonesys.com
