mobileView

Tag Switch

## Tag Alarm Pushbutton Switch

OVERVIEW

The MobileView Status/Tag Switch combines real-time recorder status indicator and an Event Tag input in one peripheral device.

Compatible with any of the MobileView series recorders, when installed the recorder video status is provided by simple and highly red and green LED indicators. The Tag Event is activated by depressing the devices's built-in push button switch. Users can create a video archive of the Event though the MobileView software that can be easily reviewed.
