

# NetworX Solution 2000 Series

Microprocessor based  
3x3 technology

## OVERVIEW

The NetworX Solution 2000 Series glassbreak sensors are the most advanced in glassbreak detection the security industry has ever seen. The Solution 2000 Series uses patented microprocessor based 3x3 technology. With 3x3 technology, these detectors identify and qualify multiple groups of data from three specific frequency ranges to determine whether any of the sounds present match the signature of breaking glass.

With a maximum detection range of 20-25 feet, a low-profile design and the option of surface or flush mount, these detectors are great for either residential or commercial applications.

With the NetworX Solution 2000 Series, you can rest assured that you have the most reliable glassbreak detectors in the world.

## STANDARD FEATURES

- 3x3 technology
- Microprocessor based
- Automatic adjustment
- Detects all glass types
- Power/Status LED
- Alarm memory LED
- Push button test mode
- Ceiling or wall mount
- UL listed

Microprocessor based 3x3 technology

## Specifications

Technology	3x3 Technology (Patented)
Input voltage	10-14V AC/DC
Current	Alarm condition: 24mA Standby, w/o status LED: 32mA Standby, w/status LED: 36mA Standby, w/latched alarm and status LED: 38mA
Low voltage detect	6.40 Volt (400mV Hysteresis)
Relay contacts	100VDC, 10VA, 500mA
Sensitivity	Automatically adjusted
Operating temperature	32 to 120°F (0 to 49°C)

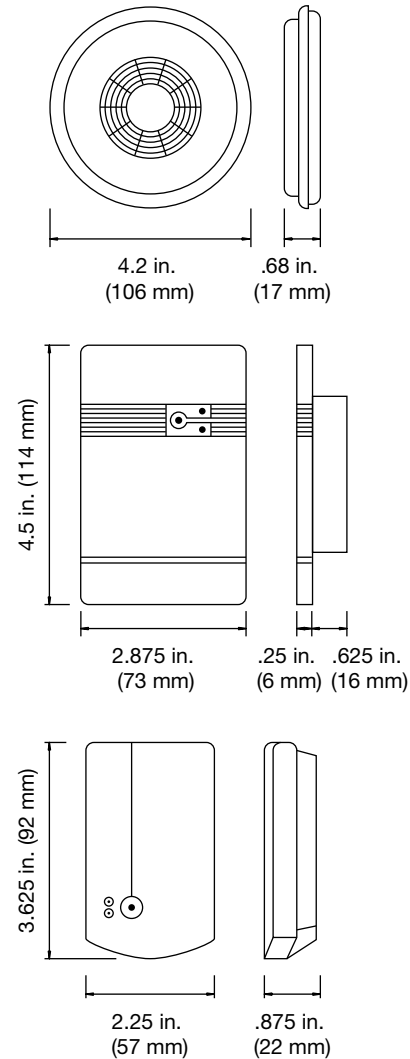

### Maximum coverage

2000	25'
2100	20'
2200	20'

## Ordering Information

<b>2000</b>	Maximum Detection Range of 25', Surface-mount, Visible LED
<b>2100</b>	Maximum Detection Range of 20', Surface-mount, Visible LED
<b>2200</b>	Maximum Detection Range of 20', Surface-mount, Visible LED
