

NetworX Quik Link Direct Connect Module

Alarm panel configuration storage for programming NetworX panels

OVERVIEW

The NetworX Quik Link Direct Connect Module makes programming NetworX alarm panels fast and easy. This USB Flash Programmer allows select modules, as well as NetworX V2 panels to have their firmware flashed in the field. The module works with any NetworX panel and can be programmed using DL900 software or via the installer program mode.

The NetworX Quik Link Direct Connect Module gives installers more flexibility because it stores up to four panel configuration files. Installers can move from one installation to the next with consistency of programming. The module makes programming panels simple and helps eliminate costly programming errors.

Specifications

Compatibility	Any NetworX panel
Requirements	USB configuration, flash files, NXProg software upgrade, DL900 upload/download software, available at interlogix.com
Adapter cable w/clips	Included
Dimensions (W x H x D)	1.625 x 3.75 x 0.875 in.

North America
T 855-286-8889

Latin America
T 561-998-6114

STANDARD FEATURES

- Connects to any NetworX control panel
- Allows direct connection between PC and alarm panel using USB
- Stores up to four alarm panel configurations
- Ability to upgrade firmware on NetworX V2 panels and expander modules' Flash memory (NX-548, NX-148E [RF], NX-1192)
- Ability to create configuration files using the installer program mode or DL900 computer software
- Saves installation time and cost
- Virtually eliminates in-the-field programming errors
- Very economical—all installation personnel can take one to the job site
