

CYBEREYE

AMAZING STATE OF THE ART DIGITAL CCTV CAMERA

CyberEye Image, is a stand alone image capture device. Its small size makes it easy to conceal and it can store up to 32 b/w images. Any CCTV monitor or TV can be used to view the captured images, ie. No PC required. By connecting the unit to a VCR, captured images can be archived. Recording of an image is initiated automatically via the built in motion detection system. Alternatively the Remote control can be used to take a picture on demand

To view the images the CyberEye must be connected to a monitor or TV, using the remote control the operator can scan through the recorded images which are Date and Time stamped. The unit is also equipped with an infra red Light so it does not need the use of special lighting at night

- Features:
- Automatically records when intruder is sensed.
 - Automatically saves recorded images.
 - Senses intruder at night by using infrared rays
 - Date and time stamp
 - Can be used as a standard CCTV Camera.
 - Records Images by using the remote control
 - Setting Up Recording Time Interval at your options.
 - Checking and Deleting Recorded Images by using Remote Control.
