

RVX18-IR RVX18-IR-W^(wiper)

All X-SERIES cameras can be configured as either conventional Domes or Ball type Pan & Tilts. Cameras are supplied as Domes, but can easily be transformed to Pan & Tilts by removing the Dome Top Cover.

In-built IR provides up to 100 metres illumination at Zero Lux. Wiper + VISOR options available. VISOR fits to pedestal mounted X-SERIES™ cameras, protecting them from the sun, rain and snow.

Dome Configuration.

X-SERIES domes all have flat toughened glass windows providing superior optics compared to conventional plastic domes. Unlike conventional domes the X-SERIES Cameras can see above the horizon without the video picture being clipped by the Dome top.

Ball PTZ Configuration.

X-SERIES Ball PTZ can be inverted and tower mounted. This mounting option provides full 360° vision.
