

# *RegardTransport*<sup>TM</sup>

*Vehicular Digital Video Recording (VDVR) system,  
for security applications in the transportation market.  
Ideal for securing buses, trains, trucks and taxis.*

The ultimate solution for mobile applications, *RegardTransport* viewing and logging server, is specially designed to withstand the harsh environmental conditions that are typical to the transportation security market. *RegardTransport* operates reliably when installed aboard buses, trains, subways, delivery trucks, taxis and law enforcement cars.

Combined with a wireless transmission interface for remote viewing and control, or used as a stand-alone recording unit, *RegardTransport* is the ideal solution for surveillance and recording incidents in mobile applications.

<i>Hardware Specifications</i>		<i>Software Specifications</i>	
Video Inputs	8	Video Resolution	CIF
Video Outputs	1	Video Compression	RegardWave (Proprietary, Wavelet Based Codec)
Audio Input	1	Audio Compression	G.723
Audio Output	1	Bi-Directional Audio	Yes
Alarms Inputs	8	Video Loss Detection	Yes
Output Relays	8	Scheduler	Yes
Ethernet 10/100 Mbps	On Board	Pre/Post Event Recording	Yes
Cellular & Wireless Support	Yes (With An External Modem)	Time Lapse Recording (Local Continuous Recording)	Yes
Recording Speed	12-25 Frames Per Second	Recording & Archiving Time	Up to 28 days as a stand alone unit
Serial Ports	1 x RS232/RS485 port 1 x RS232 port	Recorded Video Clips Retrieval (Query Mechanism)	By Date, Time, Camera, Alarm Input And VMD Zone
Hard Disk Drive (Removable)	20GB (Larger capacity can be ordered)	Multi Language Support	Yes (English, French, German, Spanish, Italian)
Power Supply	12VDC or 24VDC	Base Station (For Viewing Recordings)	<i>Regard iMax</i>
Vibrations Resistance	Up to 1.5G in the range of 0.5 to 500 Hz	Viewing & Configuration Software	<i>RegardVision</i>
Filtering System	Removable air filters	Standards	CE, UL, FCC
Dimensions	42 x 38.5 x 26.5 cm	Shock / Vibration standards	IEC 61373, EN 50155, EN 60068
