

Enterprise Performance 15K HDD

Data Sheet

High-Performing, up to 600GB, Small Form Factor 15K Hard Drive

- Stores twice the amount of Tier 1 data over previous generation, without increasing drive count, in 2.5-inch form factor
- Enables faster transaction processing, which can result in increased revenue generation and improved customer satisfaction
- Latest 12Gb/s SAS interface for improved scalability
- Industry's highest MTBF at 2.0M hours
- Support for all drive formats, including 512 Native, 512 Emulation and 4K Native
- Provides up to 18% improvement in SDR performance over prior generation¹
- SAS-based Protection Information (PI) helps protect against inadvertent data change.²
- Seagate Secure[™] drive options (AES-256) help cut IT drive retirement costs while helping securely protect data where it lives - on the drive.³
- Seagate Secure models can be used as standard drives, as ISE feature for easy drive disposal or as part of a more secure solution.³
- Seagate Secure FIPS drive option helps protect *Sensitive but Unclassified* and *Protected* class data.^{3,4}

Best-Fit Applications

- High-performance Tier 1 enterprise servers
- Blade, rack and tower servers hosting transaction-based applications
- Power- and space-constrained data centres
- · Compliance and data security initiatives

¹ Actual improvement varies depending on queue depth and transfer size.

- ² Protection Information (PI) feature requires PI-compliant host or controller support
- ³ Seagate Secure drives and FIPS drives are not available in all models or countries. May require TCG-compliant host or controller support.
- ⁴ FIPS in review. See FIPS 140-2 Level 2 Certificate at http://csrc.nist.gov/groups/STM/cmvp/documents/140-1/1401vend.htm
