FEATURES

Feature-rich C·CURE 800 Model 1

The C•CURE 800 Model 1 is designed for smaller businesses but includes the main functionality of the popular C•CURE 800. As with all models of the C•CURE 800 Series, C•CURE 800 Model 1 offers access control and alarm monitoring, e-mail, paging, closed-circuit television (CCTV), elevator control and photo imaging. As an entry-level system, the C•CURE 800 Model 1 accommodates up to 10,000 cardholders. C•CURE 800 Model 1 uses the Windows NT operating system which provides performance advantages such as use of industry standard computer hardware and communications devices, true real-time, multi-user, multi-tasking operating system with full connectivity to standard network topologies and a highly secure operating environment.

Powerful apC/8X panel

The apC®/8X Advanced Processing Controller is an 8-door intelligent access control and alarm monitoring panel which serves as a basic building block for all C•CURE® security management systems.

HID ProxPoint Plus readers and HID ProxCard II, 26 bit cards

The ProxPoint readers combine multiple configuration options with an attractive, inconspicuous design and economical price. Their potted electronics are ideal for both indoor and outdoor applications.

Wiegand/Prox Star coupler, lower board

The Wiegand/Prox Star Coupler (WPSC) allows direct connection of a Wiegand reader to the apC/8X panel eliminating the need for an RM4 personality module.

The WPSC is designed to support retrofits where all reader cabling is home run to the panel.

Optional Features

•Badging/Photo ID

•NetVue – digital video integraton of Intellex, Nice, or Loronix DVRs

•Radionics – burglar alarm panel support

•Inovonics – personal safety

•High availability options such as RAID, LAN or WAN Redundancy
