

PassagePoint for C•CURE is a comprehensive visitor management system developed by STOPware, Inc. to provide true integration of visitor management and access control. PassagePoint for C•CURE enhances corporate image and lobby security, providing documentation and accountability.

This full-featured software focuses on capturing data...who, what where and when. It records everything that enters and exits through the front, side and back doors, including visitors, contractors, temporary employees, employees without access cards, even deliveries. Best of all, PassagePoint for C•CURE integrates with C•CURE 800 systems.

FEATURES & BENEFITS

- Capture visitor information in computerized log
- Pre-register visitors and groups
- Print badges in advance or upon arrival
