SMAC-M
MULTI-STREAM
VIDEO

No compromise on fast video transmission and DVD-quality recording

TeleEye RX carries a range of professional digital video recording servers, which is designed to operate on diverse network environment and fully utilize the existing network bandwidth with optimal performance. Incorporating revolutionary multi-stream video coding technology (SMAC-M), the gold-award winning TeleEye RX delivers truly "no compromise" on both efficient video transmission and excellent DVD quality recording performance.

With built-in DVD-writer, removable hard drive and VGA output design, TeleEye RX makes recording, storage, retrieval and video monitoring much simple and flexible. TeleEye RX is one of the first video recording servers in the world in compliance of the recognized British Code of Practice BS 8418.

For high performance video recording and visual alarm verification solution, TeleEye RX is your right choice!

RX
| Video Recording Server |

RX Series

Video Recording Server

Features:

- Multi-stream Video Coding Technology
- Flexible connections: LAN, broadband & mobile network...
- Video transmission up to 100/120fps on LAN
- Recording up to 100/120fps at D1 & 400/480fps at CIF*
- Triplex operation: simultaneous monitoring, recording & playback
- Multiple login account
- Up to 16 video & alarm input models
- Support both static & dynamic IP
- IP filtering
- Built-in web server & live video on web
- Independent remote viewers
- Mobile video monitoring
- Single & multi-site monitoring
- Remote audio transmission
- Compliance with BS 8418
- Sophisticated event management
- System arm / disarm
- Pre- & post-alarm video recording
- Tamper & power interruption detection
- Entry / exit zone configurable on all alarm inputs
- VGA video output with OSD menu
- Video footage extraction through DVD writer & USB flash drive
- Remote keyboard control & IR remote controller
- Compatibility with popular telemetry protocols
- USB connection for mobile data modem
- Connectivity failover to mobile network

Comprehensive Product Family

TeleEye RX Series holds two lines of video recording server and application software to cater different applications.

RX360 Series

High performance video recording server with built-in DVD-writer and removable hard drive for standalone and remote operations.

RX320 Series

All-in-one triplex operating system supporting two internal hard drives and a VGA output design.

Multi-stream Video Coding Technology

Incorporating proprietary compression video technology, namely Multi-stream Scalable Motion Adaptive Video Coder (SMAC-M), TeleEye RX digitally compresses videos and generates independent data streams to cater for efficient transmission and high resolution recording.

Seamless video transmission by TeleEye RX can be performed in low to medium bandwidth communication networks including ADSL and mobile; whilst DVD-quality videos can be transmitted through LAN and recorded into its local hard drive with optimum speed at 100/120fps at D1 resolution. Real time recording (400/480fps) on all video channels can be achieved at CIF resolution.

SMAC-M compresses better and records 60% longer than MPEG-4 at the same picture resolution, quality and frame rate. This saves HDD cost and reduces management headaches.

Traditional Video Coding Technologies

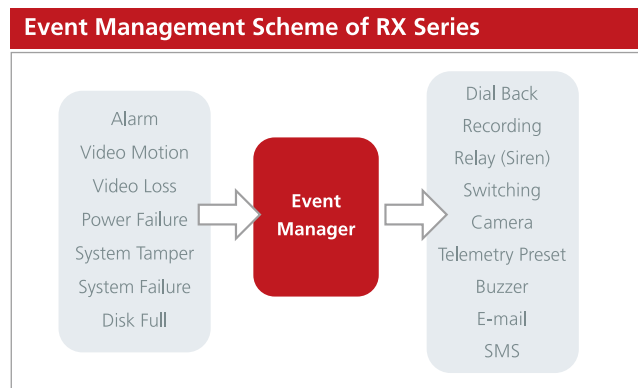

SMAC-M: Multi-stream Video Coding Technology

* For RX3616 & RX3216 only

Sophisticated Event Management

TeleEye RX provides professional and real life security control of premises with its sophisticated event management scheme. It responds to wide range of events triggered by external alarm sensor, video motion, power interruption and tamper. There is an arm/disarm control for the event management mechanism. Every external alarm input is configurable with an individual entry/exit delay, fire zone and tamper detection setting. Various actions like sending video back to a designated receiving PC, video recording, email notification, etc. can be pre-set for different events.

Quick Video Extraction

With DVD-writer and USB interface, video footage stored inside TeleEye RX can be easily extracted for evidential purposes. Recorded video can be backed up in DVD and USB flash drive and played back in any PC without any special software. TeleEye RX can also extract video remotely without the need being to the site.

Versatile Telemetry Equipment Control

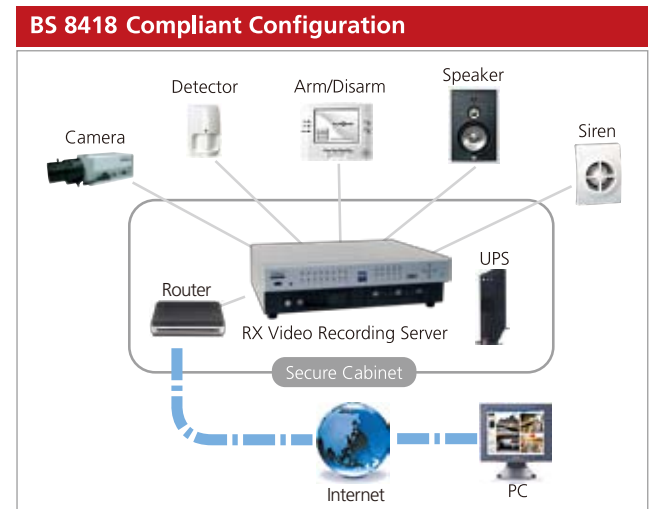

TeleEye RX works well with a wide range of telemetry systems and speed domes available in the marketplace like TeleEye DM, Pelco, Panasonic, VCL.... The system can remotely control the camera to pan, tilt and zoom for detailed viewing, follow actions of suspects and survey key points.

Low Cost Dynamic IP Internet Connection

TeleEye RX incorporated with the Group's proprietary sureLINK technology which allows low cost dynamic IP Internet connection. Users can obtain real time video by just using their sub-domain names anytime around the world.

Professional Visual Alarm Verification Solution

TeleEye RX is designed to fully comply with the British Standard BS 8418, providing professional remote monitoring and visual alarm verification solution to central monitoring stations. Features conforming to BS 8418 standard include tamper and power failure detection, data retention, system arm/disarm setting, entry/exit zone configuration, connection authentication and many more. If TeleEye RX detects a breakdown in the primary connection medium, like ADSL, it can switch the communication over automatically through to a 3G USB modem in emergency situations.

Live Video on Web

All TeleEye RX models come with built-in web servers. Users can connect the transmitter to view and playback video with a standard web browser. System configurations can be done through web server easily.

IP Filtering

As network security is a growing concern nowadays, all TeleEye RX models incorporate the "IP filtering" feature in which system administrators can control their RX video recording servers to be exclusively accessed or prohibited from certain PCs in the network with specific IP address ranges.

TeleEye RX Series Video Recording Servers

RX364 / 368 / 3616

Recording, Standalone & Remote Viewing

- Removable hard drive for flexible recording expansion
- Built-in DVD-writer & USB interface for fast video extraction
- Video recording up to 100/120fps at D1 & 400/480fps at CIF resolution
- Independent remote viewers

RX324 / 328 / 3216

Recording, Standalone & Remote Viewing

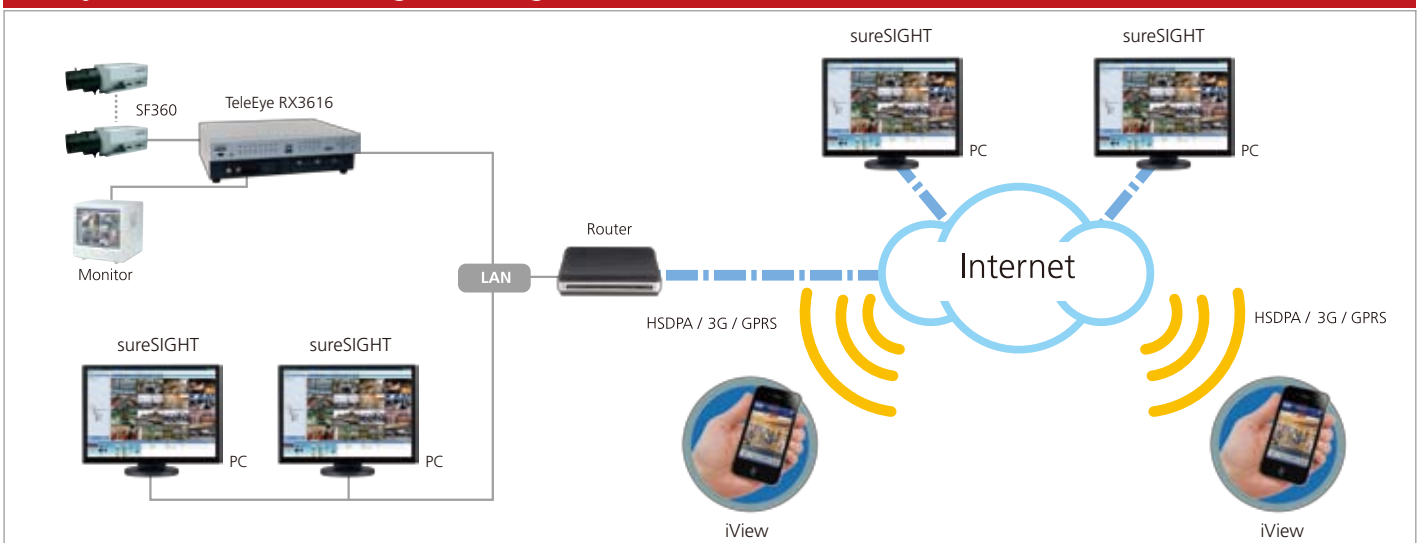

- Supporting 2 internal hard drive for enhancing recording capacity
- USB interface for fast video extraction
- Simultaneous monitoring, recording & playback
- Video recording rate up to 100/120fps at D1 & 400/480fps at CIF resolution

Recording Size Requirements on TeleEye RX Video Recording Servers

Model	D1: 720 x 576		CIF: 360 x 288	
	Frame Rate: (fps)	Size per day (GB)	Frame Rate (fps)	Size per day (GB)
RX324 / RX364	25	26	100	29
	4	7	4	3.5
RX328 / RX368	100	74	–	–
	50	48	200	60
	8	14	8	7
RX3216 / RX3616	100	95	400	118
	50	61	200	76
	16	28	16	14

Remark: The above calculation is based on PAL video standard and recording of all cameras with moderate motion at medium quality setting. Actual recording size required is subject to actual camera situation.

TeleEye RX Standalone Viewing, Recording & Remote Video Transmission

TeleEye Application Software

Single-site Monitoring

TeleEye Single-site Reception Software (WX-30) allows connection to TeleEye RX via TCP/IP.

- Digital video recording and intelligent playback search
- Automatic video recording on event
- Electronic patrol and comprehensive event log

sureSIGHT Integrated Video Management Solution

sureSIGHT supports live video viewing from up to 64 TeleEye RX Video Recording Servers. Its modular design allows customers to scale up easily and add functional modules to suit specific requirements.

- Up to 64 live video from TeleEye RX Series
- Manage multi-site and cameras simultaneously
- Comprehensive event log
- Modular design and operation
- Operator account management system

sureGUARD Video Response Centre Solution

sureGUARD is a professional video alarm management solution for Remote Video Response Centre (RVRC). It fully complies with British Standard BS 8418 for remote monitoring of detector activated CCTV systems.

- BS 8418 compliance
- Manage numerous sites simultaneously
- Comprehensive client account system: key holder information, floor plan, etc.
- Sophisticated event management and activity log: speedy visual verification, off-site arm/disarm, etc.
- Scalable design and operation
- Up to 8 concurrent connections from each video management server
- Full-screen display and individual user authorities
- Optional site map, site check and video matrix modules

Mobile Video Monitoring

TeleEye Mobile Video Monitoring Solution gives you real time video viewing with your existing mobile phone.

- Video transmission: HSPA, 3G, EDGE, GPRS, WiFi...
- Alarm information
- Digital zoom and pan
- Telemetry control
- Support advanced security mode
