

Professional Wireless Security

Introducing the next generation of wireless security, Texecom's new Ricochet mesh networking wireless technology delivers more performance than any other wireless security system.

Ricochet enabled wireless devices receive and repeat wireless transmissions from other devices. The size, scalability and range of the entire system are extended as wireless signalling is no longer limited by point-to-point communications.

The range of a Ricochet enabled wireless system is greater than previous systems, with multiple devices capable of relaying messages to and from even the most remote locations in a building.

Each Ricochet enabled device provides signalling routes to and from Texecom Premier control panels. Should wireless connection between two devices weaken, the network will 'self-heal' and automatically re-route communications via alternate Ricochet enabled devices. With more Ricochet enabled devices installed, the greater the reliability of the system.

Ricochet Enabled Panel

Premier 48-W

Wireless Control Panel

- Expandable To 48 zones
- Accepts up to 32 Ricochet enabled wireless devices
- 4 Areas
- 25 User Codes
- 500 Event Log Time & Date Stamped
- Plug-on Digimodems
- Suitable for Commercial Applications

G2

Ricochet Enabled Expanders

Premier 8XP-W

8-zone Wireless Expander

- Compatible with Texecom Premier Control Panels
- Wireless Monitor Software Diagnostics
- Engineers Keypad Connectivity
- Suitable for Commercial Applications

G2

Premier 32XP-W

32-zone Wireless Expander

- Compatible with Texecom Premier Control Panels
- Wireless Monitor Software Diagnostics
- Engineers Keypad Connectivity
- Suitable for Commercial Applications

G2

Ricochet Monitor Software

Provides greater diagnostics and configuration control over wireless system setup than ever before. Delivers device status and attribute selection with real-time graphical representation of mesh-network wireless systems.
