

ASE5300-AI

SiPass®
integrated

APOGEE interface license

- **Enables integration with APOGEE building control systems**
- **Provides a single monitoring station solution**
- **Easy to install, configure and use**

The APOGEE interface allows you to monitor alarms raised in the SiPass integrated system directly from your APOGEE Insight Workstation, and also acknowledge these alarms from that same workstation without switching systems. This same concept also extends to the monitoring of point states. As a point state in the SiPass integrated system changes, it is communicated to the APOGEE system and can be viewed by the APOGEE operator. This leads to reduced training costs and provides an increase in productivity through assimilated learning of a single environment. It also reduces the chance of error, as the operator only needs to concentrate on one interface to effectively manage two complex systems.

Features

- Monitor SiPass integrated input and output points from your APOGEE workstation
- Monitor SiPass integrated doors from your APOGEE workstation
- Ability to both unlock a door and activate APOGEE system points using a single card/badge
- Monitor alarms in SiPass integrated workstation from your APOGEE workstation
- Acknowledge alarms raised in SiPass integrated workstation from your APOGEE workstation

Benefits

When a cardholder badges an access card at a reader configured for access control, the same action can also be linked to the APOGEE system. This allows a cardholder to automatically activate a “Notification Zone”. A notification zone allows building comfort system components to be turned on that relate directly to the cardholder. For example, lighting all the areas that lead to the cardholder’s workspace and turning on the air conditioning in the cardholder’s section of the office.

Combine this with the powerful OPC A&E client option available in SiPass integrated and OPC Server in the APOGEE system and you can now achieve bi-directional flow of data. This allows both systems to communicate with each other and operators of either system to monitor alarms regardless of the workstation they are using.

System requirements

One of the following core software packages is required:

Type	Part no.	Description
ASL5000-SE	6FL7820-8AA10	SiPass integrated Standard
ASL5000-OA	6FL7820-8AA20	SiPass integrated Optima

Details for ordering

To order the SiPass integrated software extensions, you must first complete a software license order form. Please contact your SiPass integrated supplier for further information.

Type	Part no	Designation	Weight
ASE5300-AI	P24246-P2800-B1	Apogee interface	N/A
