

## ASE5300-DS

SiPass®  
integrated

### Data synchronizer tool

Automatic exchange of cardholder information

- **Enables easy, automatic import of cardholder information from third-party applications to SiPass integrated.**
- **Easy configuration**

The Data Synchronizer is a licensable tool for SiPass integrated that allows the user to share cardholder data with SiPass integrated. This can also be used in conjunction with the import/export tool that is freely available in SiPass integrated.

## Features

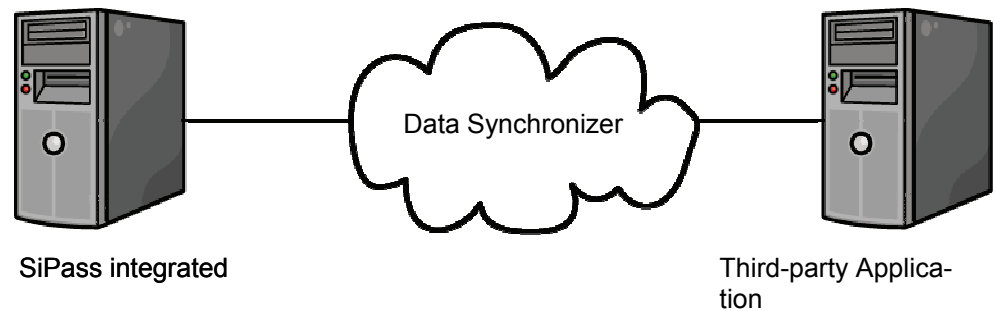

---

- **Import to database fields**
- **Task scheduling**

The Data Synchronizer allows scheduled import of data to the SiPass integrated database.

A number of advantages are provided by this tool including:

- Possibility to make a large number of changes to cardholder records in SiPass integrated database, without having to manually modify the records through the GUI.
- It provides a simple method to update the SiPass integrated database regularly if the cardholder data is managed by an application other than SiPass integrated (like a human resources program)
- If upgrading from another access control system, it allows the user to migrate data from the old system to SiPass integrated database.
- A new .INI file that is created by the tool when it is first run on a system allows the user to reproduce all the data on another system. Unlike older versions of the tool, the user text mappings no longer need to be reset.
- Possibility for the user to add as many cardholder fields as required to the list of fields to import.

## Technical data

---

Functions	Add, Update & Delete records.
Import Operation Modes	Manual confirmation: Prompts operator for decision. Automatic: Does not prompt operator for decision. Displays possible errors in the UI. Quiet: Does not prompt operator for decision. Display possible errors in log file only.

---

## System requirements

---

One of the following core software packages is required:

Type	Part no	Designation
ASL5000-SE	6FL7820-8AA10	SiPass integrated Standard
ASL5000-OA	6FL7820-8AA20	SiPass integrated Optima

## Details for ordering

---

To order the SiPass integrated software extensions, you must first complete a software license order form. Please contact your SiPass integrated supplier for further information.

Type	Part no	Designation
ASE5300-DS	6FL7820-8AE14	Data synchronizer tool
